

The **partnership** that helps your brand win.

Scale your company with Nuttifox

Nuttifox

| Your Digital Partner

Hello, I'm Chris

Founder of **Nuttifox**, who have been partnering with people since 2009, assisting with UI design, development & technical consulting.

Our team of creatives, digital experts and engineers partner with clients of every shape and size globally, producing exceptional creative work and outstanding results.

I am excited to explore whether we can deliver the same great service for you.

How we can help

We are a **Digital Product Studio**, which means we have a technology-first approach to solving problems.

That doesn't mean we make things complicated, quite the opposite. We use modern web technology and clean web design to find the optimal way to create a lasting impression.

CRMs & Automation

Moving data, triggering events and recording outcomes are tasks we take pleasure in. Effective **Automation** can be a game-changer for any business. Increase sales, improve customer retention & nurture relationships on autopilot.

The screenshot shows a software interface for "Sales Navigator Search Export". At the top, there's a navigation bar with links for Dashboard, LinkedIn leads (Beta), Solutions, and Resources. Below the navigation, a breadcrumb trail says "Back to dashboard". The main area has a title "Sales Navigator Search Export" with a progress bar indicating "Running 9%". A green success message says "Successful authentication". On the left, there's a sidebar with "Results" and "Activity" tabs, where "Activity" is selected. The activity log shows a "Success" entry: "Search successfully processed". Log details include "Started at 7/30/2023, 9:58:48 PM" and "Duration: 06s". On the right, there's a "Setup" section with fields for "Number Of Profiles" (set to 2500) and "Extract Default Url" (set to false).
